

**Cancer Institute Experimental Pathology Shared Resource Laboratory  
Price Schedule**

Processing and embedding with H&E or unstained slide--\$7.00/block (frozen or paraffin)  
H&E or unstained slide from existing block--\$5.00/block

Special histochemical stains--\$10/block  
Please call Jennifer James at 686-8265 for information regarding availability of stains

Immunohistochemical staining\* Single--\$12/block Double--\$33/block

Tissue Array-- \$50 per block

Aperio slide scanning and digital analysis--\$5 per scan for fewer than 200 scans. \$2 per scan for more than 200 scans\*\*.

\*This price assumes that investigators supply their own antibodies. The laboratory supplies all usual reagents. The cost of reagents that we do not routinely stock (universal species kits, etc) will be borne by the investigator, who will receive all unused materials when project is complete.

Immunohistochemical stains performed using untested antibodies are subject to the same fees as antibodies with known protocols and controls, even if positive results are not obtained. Please see attached requisition for more information regarding this aspect of service.

\*\*Aperio scans include server analysis time.
